

Try it! And see for yourself how well it

MONSTER WOLF MONSTER WOLF

A first in Japan! A wolf-shaped LED Wildlife Repeller

Winner of the Hokkaido Bureau of Economy,
Trade and Industry, Director-General's Prize
Eighth Monodzukuri Nippon Grand Awards
(Ministry of Economy, Trade and Industry)

International
patents
pending

Loud 90-dB sound and
bright flashing LED
lights frighten wildlife

Intimidates wildlife by
posing as their natural
enemy—the wolf!

More than 50 different
sounds keep animals
on guard.

A moving head for
a lifelike effect!

Specially designed sounds and lights ensure that wildlife stays wary!

Escaping deer

- ◎ The ultimate wolf-shaped wildlife repeller:
Frightens but does not kill animals
- ◎ Makes wild animals sense danger by imitating their
natural enemy, the wolf
- ◎ Proven to be effective in repelling bears, deer, wild
boars, and other wild animals

Escaping bear

- ◎ A proven track record since the first model (Monster
Beam) went on the market over ten years ago
- ◎ Continuing repelling effects that are appreciated by
many users
- ◎ Helps maintain coexistence and co-prosperity for
both wildlife and human communities

MONSTER WOLF

MONSTER WOLF

Modeled after the wolf—a natural enemy of many wild animals (including deer, bears, and wild boars)—MONSTER WOLF takes advantage of animals' natural tendency to sense danger and stay away.

(Abashiri City, Hokkaido)

- ★ The device is activated when wild animals approach its infrared sensor.
- ★ It emits loud sounds imitating a wolf's cry (about 90 dB) that travel over a wide area (reaching about 1 km).
- ★ The head moves left and right in a lifelike fashion, and red LED lights in the eyes and blue LEDs at the tail flash intensely to intimidate animals.
- ★ LED lights shine up from the lower limbs, highlighting the wolf's silhouette and creating a threatening appearance.
- ★ A built-in timer can be set to start and stop the device at any time interval.
- ★ The sounds are randomly generated from more than 50 different sound sources, preventing animals from becoming accustomed to them.
- ★ Powered by a 12V car battery that can be connected to a solar panel for outstanding energy savings.
- ★ Tube pipe design for an extremely sturdy frame.
- ★ Easy to install and relocate, and quickly installed in places where wild animals are likely to appear (such as animal trails).

MONSTER WOLF's structure

BASIC SPECIFICATIONS

MODEL NAME : MONSTER WOLF (Model: MW-MB02-DC12)

LED LIGHTS : High luminance specification
Eyeballs (to intimidate wildlife ahead)
Lower part of front legs (for body illumination)
Tail (to intimidate wildlife behind)

POWER SUPPLY : DC 12 V (connected to car battery/solar panel)
*Can be connected to 100 V power supply with an AC adapter (sold separately).

RATED CURRENT : 3.8A
NORMAL RATED POWER : 9.6W
SOUND : Water proof speaker
WEIGHT : 19.6kg
ACTIVATION : Temperature sensor/interval timer

Note: The device may not fully demonstrate its repellent effects depending upon its conditions of installation and surrounding environment.
